The Technological Uncanny

Elixir

- Medicine (with or without magic and mythology; technology) throughout history
- Ethnobotany, Herbalism, Chinese traditional medicine, Ayurveda, Homeopathy, contemporary “food supplement” market
- References to art history: Surrealists, Dada, Yves Klein, On Kawara, and my own art practice (H, DEIND, UO)
- Herbal animism - “gaia”, psychedelics induced animism, agents-helpers (psychedelic, analgesic effects interpretations)

GARDEN

- Cosmogony - models of the world
- Meditation
- Relationship with nature and cosmos
- Taoism, Zen Buddhism: dry rock gardens, “scholar’s garden”
- Crossroad between nature and culture/technology - simulation, control

RANDOMNESS

- Structural rhythms of the “life-world”
- Activity, networking, world building through movement of elements

Biohacking & Futurism

- Life improvement through technology
- Extreme anti-aging practices (food, supplements, sport)
- Cognitive enhancement (Modafinil...)
- Latest medical procedures - testing (stem cell healing, new organs; gene therapy)
- New medication (from old, new delivery method (nano inhalation, ...), new compounds, alkaloids from old recipes rediscovered)
- Future - Nano technologies, Stem cell research, Cryo technologies, VR uploading
