Mladen Miljanović: Realtime Monument

13 January–11 February 2023

MMC KIBLA / KiBela

You are kindly invited to the opening of the solo exhibition by **Mladen Miljanović**, which will take place on **Friday, 13 January 2023, at 7 p.m. at the KiBela art space.**

In this exhibition, Mladen Miljanović addresses the media representation of death in a time of the global pandemic, and at the same time the posthumous representation of new media devices in the form of objects carved in stone. How is death articulated through the channels of contemporary communication and how is it disseminated through the media? The artist interrogates the position of death, its commodification in capitalism, the ways in which death is represented, and the images of life that become »extensions of death«, with the assumption that when life ceases, the image or representation lives on.
